

Deva Home

Care

Here are the steps to Deva Style your hair at home.

- 1. You are going to shampoo with no poo or low poo. You must get friction at the scalp to cleanse.**
- 2. Rinse well and continue to use friction while working the product out of the hair.**
- 3. When applying one condition leave the hair soaking wet. Do not squeeze the water out of hair. Gently work one condition into hair, working midshaft to ends going down the hair shaft until you get a slick feel. For more conditioning leave one condition in the hair from 5-10 minutes then rinse well. (optional b-leave in can be put into the hair after one condition when hair is wet, to activate the curl and achieve volume. Work midshaft to ends working down the hair shaft like you did with one condition. DO NOT RINSE.) gently**

add minimal WATER to rewet hair. Also do NOT squeeze excess water out of hair.

- 4. With your head turned over in the shower take the deva gel of your choosing and lightly glaze the hair. Take a quarter size gel then rub between both your hands to distribute the gel. Starting from the bottom of your curl(ends of hair) and squeeze up making a wet tennis shoe noise. Water ACTIVATES the deva gel. Start in the middle of your head and work your way to both sides.**
- 5. Now you will take your microfiber towel (or t-shirt) working from the ends of your hair to the scalp gently squeezing the water out with your towel.**
- 6. Flip your head over and adjust your part WITHOUT raking through your curls.**
- 7. Place deva clips into your hair to create volume at the roots. Following this you will use a diffuser or air dry your curls. DO NOT TOUCH YOUR HAIR until it is dry.**

8. When your hair is completely dry take the clips out carefully. Now put your fingers into the scalp making sure not to comb or rake through the hair. Use your hands to rustle the hair at the roots (similar to scratching motion). This is called breaking the cast. This step will be used to break the cast of the gel and give curls a softer look without the crunch. With open palms use the same scrunching motion from STEP 4 to scrunch your curls and break that shell the gel has made around your hair.
